

## Selecta Biosciences to Report Third Quarter 2016 Financial Results on Thursday, November 10

November 3, 2016 8:02 AM ET

WATERTOWN, Mass., Nov. 03, 2016 (GLOBE NEWSWIRE) -- [Selecta Biosciences, Inc.](#) (Nasdaq:SELB), a clinical-stage biopharmaceutical company developing a novel class of targeted antigen-specific immune therapies, announced today that it plans to issue its third quarter 2016 financial results before the market's open on Thursday, November 10, 2016.

At 8:30 a.m. Eastern Time that day, Selecta will host a conference call to discuss these results and provide a corporate update. Investors and the public can access a live and archived webcast of this call via the Investors & Media section of the company's website, <http://selectabio.com>. Individuals may also participate in the live call via telephone by dialing (844) 309-6574 (domestic) or (484) 747-6923 (international) and may access a teleconference replay for one week by dialing (855) 859-2056 (domestic) or (404) 537-3406 (international) and using confirmation code 2975242.

### About Selecta Biosciences, Inc.

[Selecta Biosciences, Inc.](#) is a clinical-stage biopharmaceutical company developing targeted therapies that use immunomodulators encapsulated in nanoparticles to induce antigen-specific immune responses to prevent and treat disease. Selecta's proprietary Synthetic Vaccine Particle (SVP) technology is a highly flexible nanoparticle platform, capable of incorporating a wide range of antigens and immunomodulators, allowing the SVP-based products to either induce antigen-specific tolerance or activate the immune system.

Selecta's focus and strategy is to leverage its SVP immune modulating platform to develop and commercialize highly differentiated life-sustaining biologic drugs that are uniquely capable of mitigating the formation of anti-drug antibodies (ADAs). Proprietary programs that use SVP-Rapamycin to enhance efficacy and safety of therapy include SEL-212, Selecta's lead Phase 2 clinical program in chronic refractory gout, and two gene therapies programs for genetic metabolic diseases. Tolerance-inducing SVP biological products also have potential applications in the treatment of allergies and autoimmune diseases.

Selecta is also developing SVP products that activate the immune system to prevent and treat cancer, infections and other diseases.

Selecta is based in Watertown, Massachusetts, USA. For more information, please visit <http://selectabio.com>.
